ABOUT ME

Motivated and detail-oriented Computer Science student with a passion for software development and problem-solving. Experienced in C++, Java, and MySQL. Continuously improving my skills and knowledge, and currently expanding expertise through personal projects

EDUCATION AND TRAINING

[01/10/2023 – 01/07/2027]

Student

Misr international university (miu)

City: cairo | **Country**: Egypt

PROJECTS

E-commerce website

A full-stack e-commerce platform with secure authentication, product browsing, shopping cart and checkout, order tracking, and an admin dashboard with analytics.

Features: User authentication and role-based access, product catalog and search, cart/checkout/order management, admin dashboard and analytics, multi-language support (i18n), HTTPS and password hashing.

[10/04/2026 – 18/05/2026]

Mello – Full-Stack Mental Wellness ,Mood & Habit Tracking Platform

Built a full-stack mental wellness platform that enables users to track moods, build healthy habits, monitor progress through analytics dashboards, receive personalized recommendations, and engage with mindfulness activities. Implemented secure authentication, data visualization, notification services, and an intuitive user experience to support personal growth and well-being.

Tech Stack: React, Spring Boot, Java, MongoDB, Spring Security, Chart.js, Three.js

Role: Developed the Mood Tracking module, including mood logging, historical tracking, trend visualization, and user insights features.

[28/12/2024] **Otlob application**

A Java-based food delivery application supporting three user roles: seller, customer, and admin. Sellers can add or delete products; customers can browse, add to cart, and pay via card or cash; admins can manage sellers and customers.

Link: https://github.com/Samabaghdady/otlob_projectt

[30/12/2024] **contact list management system**

A contact list management system built entirely in C++ with a GUI using wxWidgets. Allows an admin to add, delete, edit, and display contacts.

Link: <https://github.com/Samabaghdady/ContactList>

tic tac toe

An interactive Tic Tac Toe game with a graphical user interface (GUI) and a customizable night mode. Demonstrates proficiency in C++ programming, object-oriented design, and user-centric development. Focused on delivering an engaging gameplay experience with added visual comfort through night mode.
